Key benefits

- Enhanced productivity of employees with flexibility to use personal devices
- Security and control that isolates corporate apps and data on personal devices
- Granular enforcement of app, data and device policies

About AppTec

AppTec develops inhouse and cloudbased Mobility Management solutions for the challenges that face firms when managing applications, configuration, and security of smart phones and tablets.

More than 2.500 customers around the world rely on the repeatedly awarded AppTec's solutions.

Managing Apple iOS, Android and Windows Phone devices by a On-Premise or Cloud-based management solution.

Managing of Apple iOS, Google Android or Windows Phone smart phones and tablets presents many new challenges to companies. With EMM companies can now also manage and configure the new mobile devices with a comprehensive management solution no matter what the smart phone operating system is.

Even if it is a question of the central installation of company-own applications and smart phones, you're at the right place. With EMM company applications can be installed on devices or can be blackand whitelisted.

The use of private devices also presents new challenges for the security of smart phones and tables. IT administrators must manage a wide range of various devices since employees increasingly want to use their smart phones at work. We can help you to easily secure all devices and the sensitive data stored on them and to manage them from a intuitive console.

The screenshot displays the AppTec360 console interface. At the top, there's a navigation bar with 'Installed Apps', 'Mandatory Apps', 'Web Apps', and 'Blacklisted Apps'. Below this, three device icons are shown: an iPhone, an Android phone, and a Windows Phone. The main area features a table of installed applications for the selected device (iPhone 5S - iOS 7.1).

Application Name	Version
CamCard	4.3.2
DB Navigator	10.60.09
Divide	2.0.5
Dolphin	7.5.1
Facebook	6.8
FindMyPhone	3.0
Hootsuite	2.5.10
Ibis	2.0.2

With AppTec Enterprise Mobile Manager you can easily manage your Apps.
